

RONA

Planning guide

Renovating the kitchen

step by step

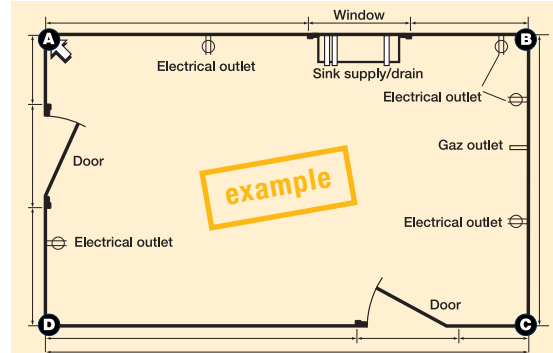

i rona.ca

Draw the plan view

1

- ▶ Start measuring your kitchen from one corner and work around the room.
- ▶ For each wall indicate door and window openings as well as any obstructions.
- ▶ Also indicate existing plumbing, electrical heat and ventilation locations.

Scale: 1/4 inch = 1 foot

START →

→

Draw the elevation plan

2

- ▶ Indicate any bulkheads (if present).
- ▶ Mark exact locations of sink, gas, electrical outlets and switches on the drawing.
- ▶ Measure openings (windows/doors) from floor to windowsills and from edge to edge of casing.

Scale: 1/4 inch = 1 foot

wall 1 Outdoor Indoor

A **B**

wall 2 Outdoor Indoor

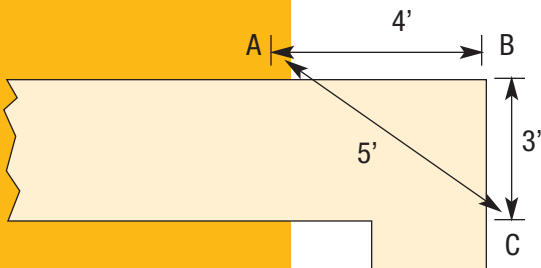

B **C**

wall 3 Outdoor Indoor

C **D**

wall 4 Outdoor Indoor

D **A**

To verify the angle of the corners:

1. Measure 4 feet from A to B and mark.
2. Measure 3 feet from B to C and mark.
3. Measure the distance between A to C.

A perfect 90° angle should show 5 feet. If the length you obtained is higher than 60 1/4 in or less than 59 3/4 in, make sure to write down the exact measurement on your plan.
